Review question on Array and pointer

1. Find the largest element of a given array of integers.

2. Find the largest three elements in an array

3. **Find second largest element in a given array of integers.**

4. **Find k largest elements in a given array of integers**

5. **Find the smallest element missing in a sorted array.**

6. **Find update every array element by multiplication of next and previous**

7. **Find the two repeating elements in a given array of integers.**

8. write a C++ code to swap values of two variables using pointers.

9. List of pointer programming exercises

10. Write C++ program to swap two numbers using pointers

11. Write C++ program to add two numbers using pointers

12. Write C++ program to Sum of Array Elements using Pointers

13. Write C++ program to find length of string using pointer

14. Write C++ program to copy one string to another string using pointer

15. Write C++ program to concatenate two strings using pointer

16. Write C++ program to print the elements of the array in reverse order using a pointer

17. **Write a C++ program to read and print elements of array. – using recursion.**

18. Write a C++ program to print all negative elements in an array.

19. Write a C ++ program to find sum of all array elements. – using recursion.

20. Write a C ++ program to find maximum and minimum element in an array. – using recursion.

21. Write a C++ program to find second largest element in an array.

22. Write a C++ program to count total number of even and odd elements in an array.

23. Write a C++ program to count total number of negative elements in an array.

24. Write a C ++ program to copy all elements from an array to another array.

25. Write a C++ program to insert an element in an array.

26. Write a C++ program to delete an element from an array at specified position.

27. Write a C ++ program to count frequency of each element in an array.

28. Write a C ++ program to print all unique elements in the array.
